Kates for Charging Automobiles

Electric automobile charging outfits are op erated on our regular power rate, which consists of a service charge of \$1.00 per horsepower per month, plus a charge for the current consumed.

Cars having from 24 to 32 cells are rated at 2 horse-power, and from 32 to 44 cells, 3 horse-power. The consumption of current varies from 100 to 300 kilowatt hour per month—depending on the number of miles car is run, which gives a rate of from 4 to 5 cents.

Our rate for the first 100 kilowatt hours is 6 cents, for over 100 kilowatt hours and under 200 kilowatt hours 5 cents, and over 200 and under 300 kilowatt hours the rate is 4 cents.

The greater the amount of current used the lower the rate per kilowatt hour.

The average cost of running a pleasure car is from \$7.50 to \$12.00 per month. No other mode of travel is so clean, convenient and economical as with an Electric

car. Any lady can operate it and you know

just what it costs you each month. Indiana & Michigan **Electric Company**
